### CLARK'S STEEL-TRUSS *Safety* LADDERS

CLARK'S Steel-Truss is a patented single unit, rod and rung construction whereby each rung is made stronger and the entire ladder is TRUSSED for tremendous strength, rigidity and safety. In Clark's Steel-Truss, rod and rung are united. This is an exclusive Clark feature. Clark's Steel-Truss is available in taper or farm ladders—extension ladders, with or without rope, or rope, pulley and windlass. The strongest, safest, most durable ladders made. Send for Clark's Catalog.

### OUTSTANDING STEPLADDER VALUES

● **DURABLE.** Best heavy duty step-ladder. Extra wide corrugated steps. Patented rod construction. Steel shoulder supports under steps. Hard-ware bright aluminum. Steel truss safety back brace construction.

● **RID-JID SAFETY FIRST** — Deeply corrugated, extra wide, Non-Slip steps. Patent steel rod construction. Rubber shoes. Stiles and back standards, extra heavy Steel truss safety back brace construction. Greater Strength and Safety. Finer Appearance. Faster Selling.

### RID-JID DeLuxe

#### SELF OPENING, LOCKING, CLOSING

● The patented lock ring closes automatically and makes the entire table an integrated solid unit. This new feature gives new rigidity, steadiness and solidity. Top shaped with beaded edge, clear lacquer finish. Formed steel understructure, finished in attractive green toned bronze. Legs equipped with moulded rubber tips. Size of top 15" x 54".

### SPACE-SAVER STEP STOOL

● Built of steel, it has great strength and light weight. Its extra rigidity is a result of scientific bracing, securely riveted, and the ingenious treads with corrugated rubber bottoms. Note extra-wide, safety-grooved steps. All metal members of brilliant malachite green metallic finish. Steps and tops of bright CARDINAL, or GREEN or BLACK. Folds like a camera, compactly to 4 inches by 31 1/2 inches. Packed one to a carton.
